## PROFESSIONAL SUMMARY

I am very passionate about the 3D animation field and am aiming to continuously develop my skills in the ever growing climate for CG artists. The areas in which I am most driven to develop my skills are in Character Modeling, Texturing, Look Development and Compositing, however, I would also be interested in the opportunity to grow in my 3D animation.

Throughout my third year of studies to create our 3D short film my roles included:

- Production Manager
- Lead Texturing and Shading Artist
- Character Modeling and Texturing Artist
- Lighting and Surfacing Artist
- Compositing Artist
- Asset Modeling and Texturing Artist
- Layout Artist

As a Production Manager I organized a team of 9 to make a 3D short film, this required collecting data and setting deadlines across all pipelines in order to complete our film within the 9 months we were given.

Programs in which I am most proficient include Autodesk Maya, Substance Painter, Zbrush, Nuke and Photoshop. I also have experience with programs such as Substance Designer, ToonBoom, After Effects, Animate CC and Premiere Pro.

To whom it may concern,

This letter serves to confirm that Hannah O'Brien interned at Fuzzy Logic from December 2018 to January 2019.

During this time Hannah was exposed to various art disciplines such as 2D illustration, 2D animation, 3D modelling, 3D texturing, 3D rigging and 3D animation. She worked alongside members of our art team helping to both finalise existing work as well as conceptualise and create new items.

Hannah was an incredibly eager, friendly and helpful individual and someone that we enjoyed having in the office. We were sad to see her go and wish her the absolute best for the rest of her studies.

A handwritten signature in black ink, appearing to read "JRied". The signature is stylized with a large, looped "J" and a cursive "Ried".

regards,

Jason Ried

Managing Director
